

# PRODUCT CATALOGUE

Careon Healthcare Solutions provide wide range of sterile surgical drapes, packs, gowns, aprons, instrument covers and surgical consumables for all type of surgical procedures. We are using different types of medical grade non woven breathable/non breathable, bacteria barrier fabrics of different protection levels and comforts. Sterile and easy to use drapes and packs give total protection throughout the surgical procedures.

## ABOUT US

Careon was stated in 1991 by a team of experts having years of experience in the manufacturing medical disposables with a commitment to control hospital infections by providing top quality single use medical apparels

## QUALITY POLICY

"Careon is committed to manufacture & market medical disposable products confirming to national and international standards. Careon values customer satisfaction as paramount objective. We believe in delivering products which fulfill medical requirements and expectations in terms of product quality performance and safety at optimum cost".

### **Surgical Drapes and Packs**

Most of the hospitals use alkaline chemicals and detergents for washing surgical sheets. Due to this, the surgical sheets tend to acquire a PH value higher than 7, which aggravate the wounds in contact. Also the foaming property of the detergents lead to creation of bubbles in blood circulation which is very dangerous.

### **Sterility**

Using sub-standard, Non-Hygiene and high bacteria level sheets lead to higher chances of infection, irritations of the wound, longer healing time, more in take of antibiotics and longer stay of patients in the hospitals. In this era of modern safety facilities and values for human life, Careon is using internationally accepted SMS, different types of absorbent and repellent non woven fabrics which are friendly and non irritant to human body.

All our Drapes and Packs are air tight packed in our most modern clean room and E.T.O. Sterilized. We offer sterile, non irritant and safe hygienic products, which will add as a successful companion in your surgical operations. We have a wide range of Drapes and Packs suitable for all types of procedures. For confirming sterilization, we attach sterile indicator to each packet of our Drapes and Packs. Please allow us to be your most responsible companion to prevent Hospital Infections.

### **Prophylactic Antibiotics Side effects**

Use of antibiotics leads to - fatal liver damage, Jaundice, Brain, Kidney, Neuro, Cardio vascular, Gastro Intestinal damages, Decreased WBC count, etc. The use of antibiotic combinations have higher risk as the toxicity of one antibiotic will be enhanced by another. Super infection resulting from the use of antibiotics are another danger. Above all the development of micro organisms which are resistant to antibiotics is an International threat.

### **Remember the rule of using antibiotics**

"The first rule of antibiotic is to try not to use them and the second rule is try not to use too many of them"

**Paul L. Marino The ICU Book**
